### 7-Day Electromechanical Timers

Heavy-duty mechanical timers feature permanent magnet, self-lubricating, synchronous type motors. Provide flexibility of different programs for each day of the week. Skipper allows any day or days to be omitted from program.

Uses: Time-of-day scheduling of HVAC systems.
- Heavy-duty gears with clutchless design prevent slipping
- Brass contacts are tungsten rated to handle inrush currents 10 times their rating
- 7-day dial with manual override lever
- No. 2A210 features compact design; contact rating of 120-277VAC
- Nos. 1A219 & 1A220 contact rating: 120-240VAC

#### SPRING-WOUND CARRY-OVER MODELS

Nos. 2A209, 6X757, and 1A220 provide a maximum of 16 hours of continuous duty during power failure. Carry-over rewinds itself during resumption of power.

### 7-Day Electromechanical Timers

Reliable timers permit different settings for each day of the week and the flexibility to omit any day or days from the program. Snap-out timer mechanism is housed in an indoor NEMA 1 metal enclosure with gray finish, knockouts, and hasp.

Uses: Time-of-day scheduling of HVAC systems.
- All timer motors are self-lubricating, synchronous type
- 4-pole single throw
- Heavy-duty gears with clutchless design prevent slipping
- Contacts are tungsten rated to handle inrush currents 10 times their rating
- 7-day dial with manual override lever
